Syllabus

This is a project based course with 100 percent of course grading based on projects. The projects need to have a back end front end and some kind of structured data format preferably (when I say preferably I mean that if using some other form you will be graded accordingly) database. You will be organized into teams and will work towards the same project. At the end you will also grade your teammates and that will be taken into account when the final grades are submitted.... Please keep that in mind. Also the presentations and your part in it the project matter as well.... You will also submit a report documenting your individual part in the project... Classes will require you speaking into a mic and when asked you should respond.....

Students who participate in this class with their camera on or use a profile image are agreeing to have their video or image recorded solely for the purpose of creating a record for students enrolled in the class to refer to, including those enrolled students who are unable to attend live. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate orally are agreeing to have their voices recorded. If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live
